

SOLUTION
eHOME

A turnkey Energy Storage Solution protecting homes from extended power cuts.

eHome is designed for markets where input power is particularly unstable and intermittent. eHome provides extended runtime: up to 18 consecutive hours, even if utility power is only available as little as 6 hours in 24 hours.

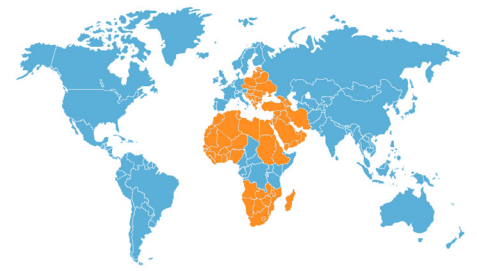

E24 eHome Solution includes inputs and outputs to seamlessly integrate with an existing solar PV array and a generator to minimize energy costs while optimizing uptime.

KEY FEATURES FOR A POSITIVE IMPACT ON QUALITY OF LIFE

- Longer battery lifecycle (up to 10 years)
- Ergonomic design
- Low Operational Cost
- Silent and nonpolluting
- Financial Engineering
- Maintenance Free
- Unattended operation
- Lower cost operation than diesel generators
