

PROREC

Your Partner in Sustainable Development
For the Agri-food Industry

FOOD RECOVERY SINCE 1996

Since 1996, Prorec has joined forces with food manufacturers to repurpose food waste into nutritional animal feeds. Recovering and reusing food waste is critical because it leads to a drastic reduction in the consumption of prime material and consumable resources. That is why Prorec is a major player in sustainable development and for the green economy of Quebec! By giving a second life to materials otherwise intended to landfill, we contribute to reduce the environmental impact of animal husbandry each and every day!

PROREC CONTRIBUTES TO SUSTAINABLE DEVELOPMENT!

OUR IMPACT EACH YEAR IS THE EQUIVALENT OF:

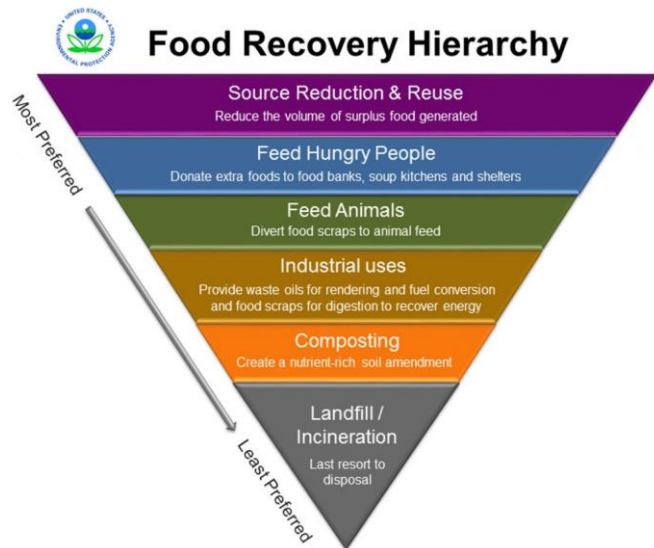

- ✓ 6,700 ACRES OF CROPS REPURPOSED
- ✓ 30,000 TONS OF CO2 AVOIDED
- ✓ 120,000 CUBIC METERS OF LANDFILL SPACE SAVED
- ✓ FEED FOR 200,000 PIGS
- ✓ AND 15,000 UNITS OF CARBON OFFSETS MARKETED

Putrescible organic material is particularly responsible for the acidification of soils and methane leakage when buried into landfill. If a part of the methane generated in the landfill is collected, fugitive emissions still remain very important. Therefore, diverting organic matter from landfills is set as a priority.

Prorec's commitment to recover food waste and reuse it as animal feed production leads to more recycling of putrescible organic matter and less composting or landfills.

Today, thanks to this effort, more than 100,000 metric tons of organic residues are now re-used in animal feeding on an annual basis and in full compliance with animal feed standards.

This year, Prorec has contributed significantly to reducing the amount of crop used in conventional breeding. Moreover, Prorec's recovery activities generate 15 000 units of carbon offsets each year.

CAN WE HELP YOU?

Going further in environmental management with Prorec!

Prorec aims to help food industries to carry out all kinds of green projects and achieve Sustainable Development objectives.

The sustainability of a project or an organization is ensured when it is based on a solid foundation: it respects its local and global environment, in harmony with society while promoting the creation of wealth. To guarantee its sustainability, every organization aims to achieve balance with its direct and indirect environment.

Prorec provides the means, tools and training to help you improve your environmental impact through sustainable development.

This is achieved by establishing a rigorous diagnosis, by developing customized solutions in each case and by monitoring the situation step by step until the process is fully optimized. In order to provide the best possible service, Prorec has progressively developed expertise in the field of environment and sustainable development in food industry. This unique service is offered to you from now on.

For Prorec, supporting Sustainable Development means enabling manufacturers to become more responsible in their environment.

PROREC IS INVOLVED WITH YOU AND OFFERS VARIOUS SUPPORT SERVICES:

- ✓ OUR EXPERTISE ON BETTER RECYCLING TECHNIQUES AVAILABLE
- ✓ FAST, SIMPLE, PERSONALIZED AND CUSTOMIZED SOLUTIONS
- ✓ COMPLETE INTEGRATED WASTE REDUCTION SERVICE
- ✓ ENVIRONMENTAL CONSULTATION SERVICES AVAILABLE
- ✓ REDUCTION OF WASTE MANAGEMENT COSTS
- ✓ DESTRUCTION CERTIFICATES AVAILABLE
- ✓ TRACEABILITY OF WASTE CAPABILITY
- ✓ DETAILED TRACKING REPORTS PROVIDED
- ✓ ONE STOP SHOP SUPPLIER

*PROREC AND YOU,
a winning partnership*
